

## DEDICATED WEB SERVER

CMS400  
HOSTING

So you want total control of the server? A **DEDICATED SERVER** is the right choice. WSOL offers dedicated web and SQL servers to accommodate high-end needs including advanced security requirements and complex configurations. We handle the basics (backups, anti-virus, and Windows updates) and you control the rest.

### Profile

#### In a dedicated environment, clients can:

- Run multiple sites
- Remotely access the server
- Install additional software
- Customize configurations
- Access IIS

### Plans

#### Web Server \$750 setup, \$700 per month\*

137 GB web space	1 GB SQL disk space (Shared SQL server)
Remote access	150 GB monthly bandwidth
3 IP addresses	Microsoft Windows 2003 or 2008
CMS400 Installed (client must provide license)	

\* - Setup includes configuration of one CMS400 site. Additional CMS400 site setups are \$199 per site and each additional database is \$25 per month. Advanced configuration services including load balancing, eSync and more are available at our normal hourly support rate.

#### SQL Server \$750 setup, \$1,150 per month

137 GB SQL space	Remote access
Microsoft SQL 2005 or 2008	

### Customize

#### Customize a plan by adding:

Additional Bandwidth	\$2 / GB per month (\$1 / GB per month when purchased in advance)
Additional Disk Space	\$5 / GB per month
Additional Email Accounts	\$2 / account per month
Additional SQL Database	\$25 per database per month (1 GB)
MyLittleAdmin for SQL	\$25 per month

### Friends

Dedicated hosting is **the** choice for enterprise-level CMS400 deployments. With dedicated physical hardware and total control of the server, clients can tailor a solution to meet their requirements. Some of WSOL's dedicated clients include:

Roman Catholic Diocese of Brooklyn

Judson University

Premier Health Partners

Cardinal Stritch University
